DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, drawn to illumination device with flashing controller, classified in class 315, subclass 200A.
 - II. Claims 4-20, drawn to speed-controlled wheel illumination device, classified in class 315, subclass 79.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the claimed inventions are different since they have different modes of operation, specifically Invention I is a flashing device independent of a vehicle speed, while the flashing frequency of Invention II is determined by the rotational speed of the vehicle.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
